

AMO ClariFlex CLRFLXB	B&L SofPort - SoFlex SE
	
Overall \AA (mm) = 13	Overall \AA (mm) = 13
Optic body \AA (mm) = 6	Optic body \AA (mm) = 6
Angulation = 10°	Angulation = 5°
3-piece	3-piece
Haptic material & design	
PMMA, mod C	PMMA, mod C
Optic material - design and Refractive Index	
Silicone - Biconvex, Si 1.46	Silicone - Equi-biconvex, Si 1.43
Spherical range	
?	0.0 to 4.00 D, 1.0 steps 5.0 to 30.0 D, 0.5 steps
A constant / SF	
118	118
PCO feature	
OptiEdge	Square Edge
	 <p data-bbox="900 1451 1369 1491">SEM photograph highlights the SoFlex™ SE square edge</p>  <p data-bbox="847 1686 1422 1704">Square edge blocks cell migration</p>
Inserter	
Unfolder Silver-T	SofPort Mport SI
Technic	
2-handed	1-handed
Incision size (mm)	
3.0 mm	sub-3.0 mm

Arguments

"The new standard of IOL performance"	"Total control means total success"
Advanced performance with the exclusive OptiEdge	Latest advance in IOL and Inserter Technology
Uniquely designed to minimize PCO and glare and to insert through an unenlarged incision	Designed around your Patient's Needs
The squared posterior edge is designed to minimize PCO	A full 360-Degree contact Square Edge to facilitate reduction of PCO. Designed to reduce unwanted optical images.
Designed to reduce glare intensity	Designed to reduce Unwanted Optical Images. Edge Glare
The sloping side edge is designed to direct reflections away from the retina	Square Edge Design : internal reflection is directed away from fovea - compared to side-sloping edge optic designs
Proven ease of implantation : - implants 6.0mm through unenlarged incision - slow, controlled release into capsular bag - prevents contact with wound and exterior of eye, reducing potential for postoperative inflammation	Ease of use with a sub-3.0 mm incision Fingertip control with just one hand : - alignment into capsular bag is facilitated by planar delivery - leading haptic is positioned to be delivered directly into the capsular bag without sweeping motion - no additional instruments needed to position inferior haptic into capsular bag Spring-loaded design provides balanced control throughout entire procedure.
A tradition of ophthalmic excellence : - third-generation silicone IOL - near-constant center thickness - non-tacky surface - flexibility at or temperature - vacuole-free material - ideal stepping stone	The first true integrated system. The one innovation that changes everything : - the benefits of a steril, single-use system, cannot be underestimated - the risk of cross contamination is eliminated with the disposable inserter.
The new standard of IOL performance. Only ClariFlex with optiedge offers : - Optiedge design to minimize both PCO and glare - Exclusive, third-generation IOL technology - Allergan surgical's 14-year record of safety - the proven Unfolder Silver-T implantation system.	Controlled, planar delivery offers surgeons unparalleled ease of use : - experience the ultimate in control - planar delivery is assured every time - ease of use with a sub-3.0 mm incision.
